Solar Charge Controller 101: A Beginner's Guide

What Does A Charge Controller do?When Do You Need A Charge Controller?Types of Charge ControllersConclusionA solar charge controller manages the power going in and out of the batteries in a solar power system. It does this by regulating voltage and current. It stops your batteries getting overcharged by controlling the flow of energy from your solar panels. It also

stops the reverse flow of power, which can drain and damage the battery bank, from your b See more on solarenergyscout
