

Solar power generation home street light installation

Overview

A typical solar street light installation has five work packages: site survey, civil works (foundation and anchor bolts), pole erection, luminaire/solar assembly mounting, and commissioning. A system that looks simple in a product photo can still be complex. Installing a solar street light with a pole is a streamlined process that, when done correctly, ensures a safe, durable, and reliable lighting solution for years to come. Unlike traditional grid-tied lights that require extensive trenching and complex electrical work, a solar street light system is not. Read on to learn how to set up a street light solar system to illuminate your driveway, neighborhood, and anything else you want. Below is your step-by-step guide to setting up a solar light system for the street. Once they complete their first project with us, they are hooked. The installation process is quick.
