

Solar power generation patent disclosure

Overview

The present disclosure includes articles of manufacture, systems and processes that relate to a portable, modular solar power generator with energy storage capacity and an energy management system to process both DC and AC power, including the capacity to form a micro-grid power. The present disclosure includes articles of manufacture, systems and processes that relate to a portable, modular solar power generator with energy storage capacity and an energy management system to process both DC and AC power, including the capacity to form a micro-grid power. Search within the title, abstract, claims, or full patent document: You can restrict your search to a specific field using field names. Search by Cooperative Patent Classifications (CPCs): These are commonly used to represent ideas in place of keywords, and can also be entered in a search term box. Disclosed is an apparatus for a solar power generator as it relates to a portable and expandable solar power generator that can form a micro-grid power system comprising any elements described, either individually or in combination with any other elements, in any order. Patent Public Search has two user-selectable modern interfaces that provide enhanced access to prior art. The new, powerful, and flexible capabilities of the application will improve the. Solar technology harnesses electromagnetic radiation (i. Federal government websites often end in. The <https://> ensures that you are connecting to the.
