

Thailand downgrades PV module exports

Overview

With shrinking export opportunities and weaker domestic demand, several photovoltaic producers are reportedly scaling back their Thai operations. This impacts every stage of the solar value chain, from sourcing solar components to the investment in new production equipment. According to a Q2 2025 market report from SEIA, Thailand, along with other Southeast Asian nations, faces tariffs of up to 36% on solar cells and modules. These duties, with cumulative rates sometimes soaring as high as 3,500% for the region, have made Thai-manufactured solar components. CHONBURI/RAYONG - On a humid day in February, a small group of workers huddled in front of a large solar panel factory in Thailand's biggest manufacturing hub in the eastern coastal province of Chonburi, home to some of the world's top solar panel producers. The men and women, mostly in their 20s. On April 21, 2025, the U. Department of Commerce (DOC) issued its final determinations in the Antidumping Duty (AD) and Countervailing Duty (CVD) investigations on cells exported from the four Southeast Asian countries-Cambodia, Malaysia, Thailand, and Vietnam-as well as. On Tuesday, October 1, 2024, the U. Department of Commerce (Commerce) and the U.

Thailand downgrades PV module exports

Thailand

As of 2024, export activity still remained a key driver with slightly drop from the previous year, with PV panel exports valued at approximately \$2.1 billion and
