Overview

The largest wind turbine is the MySE 16-260, built by Mingyang Smart Energy (China) for the China Three Gorges Corporation (CTG). The MySE 16-260 has a rotor diameter of 260 m (853 ft), with three 123 m (406 ft) long blades and a 14m (46 ft) diameter hub, and a generating capacity of 16 megawatts. News about switching to greener energy sources is always good news, and this certainly counts: The world's largest wind turbine constructed to date is now up and running and contributing to the power grid in China. included the 13-megawatt GE Vernova Haliade-X installed (but subsequently destroyed) off the coast of Nantucket and the smaller 11-megawatt Siemens Gamesa SG 11. Manufactured at DEC's factory in. This is a list of the most powerful wind turbines.
