

There is a problem with the lithium-ion battery in the communication base station

Overview

This usually happens when the BMS does not receive any message from the charger for more than five seconds. To troubleshoot, begin by inspecting the charger hardware. Below we outline common problems along with practical solutions. The battery management system in a lithium battery pack management system protects safety and ensures reliable operation. The table below. In the communication power supply field, base station interruptions may occur due to sudden natural disasters or unstable power supplies. If you experience problems with VictronConnect, first consult the VictronConnect manual, especially the troubleshooting chapter. Lithium-ion cells are the energy reservoirs, storing electrical energy in chemical form.
