

Vienna battery research and development

Vienna battery research and development

Battery Innovation Center :: Forschungsinfrastruktur

As well as the functional development of new high-voltage batteries for electric vehicles, the main focus is on the development, implementation and validation of new, highly efficient production processes.

Battery Technologies

Our scientists address the entire development chain, ranging from basic research on material optimisation to sustainable production technology on a semi

Austria -

Based in Graz, Styria, the company has been a leader in developing, simulating and testing drive systems - and since 2007, in creating safe, efficient and cost-effective battery systems for electric

[Varta expands its research capacities with new facility](#)

With the expansion of Varta Innovation, one of the most modern research facilities for battery technology in Europe is being created at the Graz site in Austria.

VARTA expanding R& D capabilities for next-gen

Scheduled for full operation by the second quarter of 2024, the facility will boast an increased number of international researchers by the end of

VARTA Builds Battery Research Center in Austria

VARTA Innovation, one of the most modern research centers for battery technology in Europe, is being built in Graz, Austria, on a 3,500-square

[VARTA expands battery research with new facility in Graz](#)

VARTA AG is boosting research and development of next-generation batteries. With the expansion of VARTA Innovation, one of the most

VARTA expands its research capacities with new

Through intensive research and development, VARTA AG sets global standards in lithium-ion technology and microbatteries and is recognized
