

# What are the methods for manually connecting photovoltaic panels

**LFP 12V100**

## Overview

---

Installers have two methods for connecting photovoltaic panels at their disposal - series connection and parallel connection. Each has its own advantages and disadvantages, as despite some similarities, their operational characteristics differ significantly. There are several ways to connect the panels (series, parallel, mixed) and the choice depends. There are three wiring types for PV modules: series, parallel, and series-parallel. Solar panels convert sunlight into electricity through a process called the photovoltaic.
