

# What does solar power generation A panel refer to

## Overview

---

A solar panel is a device that converts sunlight into electricity by using multiple solar modules that consists of photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. These electrons flow through a circuit and produce direct current. At a high level, solar panels are made up of solar cells, which absorb sunlight. Sunlight is composed of photons, or particles of solar energy. This conversion process happens without any moving parts, making it a quiet and.
