

Why does the UK have solar power

Overview

The UK has made significant strides in embracing renewable energy, with solar power emerging as a leading choice. But why does the UK use solar power, despite its often cloudy skies?

The answer lies in the nation's commitment to sustainability, energy security, and reducing carbon. Top-right: the CIS Tower was clad in building-integrated PV and connected to the grid in 2005. Solar power has a growing role in electricity production in the United Kingdom, contributing around 6%. As of 2025, on sunny days, it provides over 30%. Solar Energy UK (SEUK) has been delighted to co-chair this Taskforce with the UK Government, on behalf of the entire solar industry. 1 What are plug-in solar panels - and how do they work?

Why introduce plug-in solar panels in the UK?

. The UK solar industry has undergone dramatic change over the past year, spurred by a mix of progressive legislation, evolving grid infrastructure, and soaring demand for renewable talent. Following on from our 2024 blog, many of the projections we made are not only materialising but accelerating.
